Save the date

March 9-11, 2006
Hyatt Regency, Bethesda, Maryland

The Educational Objectives for this conference will be:

- Discuss the latest scientific findings from federally-sponsored research programs in traumatic brain injury.
- Describe methodological pitfalls and innovative strategies in research design that may impact the rigorous examination of intervention strategies across the entire spectrum of injury, from acute care to community integration.
- Provide structured opportunities for representatives from each agency to collaborate and develop action agendas focused on areas of mutual interest in TBI research and dissemination.
- Highlight models of innovative and practical service delivery that have been field-tested and evaluated.
- Engage in interactive dialogue with consumers, researchers, administrators, policymakers and clinicians on cross-cutting issues that may impact service delivery and research with persons who have experienced traumatic brain injury, their families and their communities.

Participants will also gain knowledge in the following research areas:

Effectiveness of rehabilitation interventions
Long-term consequences of TBI, including quality of life
Measurement of outcomes following TBI.
