

ERRATA

In Vol. 37 No. 2, on page 179 of the article “Continuous Passive Motion (CPM): Theory and Principles of Clinical Application” by O’Driscoll SW and Giori NJ, a reference for a quotation was omitted.

In the introduction the article states: Von Riemke, in his presidential address to the Danish Surgical Society in 1926, stated that, “All joint affections...should be moved. Movement should begin on the first day, should be very slow, and as much as possible it should be continuous.”

The reference for this quotation is: Riemke V. Eine mobilisierungsmethode bei gelenkaffektionen (A method for mobilization for affections of the joint). Zentralblatt Fur Chirurgie 1926;53:1887–9.

In Vol. 38 No. 1, on page vi of the Contents page, the arti-

cle title, “SLO radiant power and brightness” by Rolf W. Nygaard, PhD and Ronald A. Schuchard, PhD contains a typographical error: the word *radient* should be changed to *radiant*.

In Vol. 38 No. 1, on page 124 of the article “SLO radiant power and brightness” by Rolf W. Nygaard, PhD and Ronald A. Schuchard, PhD, an integral was omitted from **Equation 1a** and a prime from **Equation 2a**.

Change **Equation 1a** to

$$\Phi = K^m (lm / gmW) * \int_{\lambda} [P\{\lambda\} (\mu W) * V\{\lambda\}] d\lambda \text{ (Equation 1a) (4).}$$

Change **Equation 2a** to

$$E_R' = L' * A_p' / (f_e')^2 \text{ and } E_R = L * A_p / (f_e)^2 \text{ (Equation 2a) (7).}$$
