CONTENTS

Masthead

Guest Editorial:
Exercise after stroke and spinal cord injury: Common biological mechanisms and physiological targets of training
Richard F. Macko, MD; Joseph Hidler, PhD

JRRD at a Glance

Scientific/Technical Articles

Exercise-mediated locomotor recovery and lower-limb neuroplasticity after stroke
Larry W. Forrester, PhD; Lewis A. Wheaton, PhD; Andreas R. Luft, MD

Effect of treadmill exercise training on spatial and temporal gait parameters in subjects with chronic stroke: A preliminary report
Shawnna L. Patterson, MD, PhD; Mary M. Rodgers, PhD, PT; Richard F. Macko, MD; Larry W. Forrester, PhD

Activity-dependent plasticity in spinal cord injury
James V. Lynskey, PhD, PT; Adam Belanger, MS; Ranu Jung, PhD

Treadmill training after spinal cord injury: It’s not just about the walking
Audrey L. Hicks, PhD; Kathleen A. Martin Ginis, PhD

Task-oriented treadmill exercise training in chronic hemiparetic stroke
Frederick M. Ivey, PhD; Charlene E. Hafer-Macko, MD; Richard F. Macko, MD

Skeletal muscle changes after hemiparetic stroke and potential beneficial effects of exercise intervention strategies
Charlene E. Hafer-Macko, MD; Alice S. Ryan, PhD; Fred M. Ivey, PhD; Richard F. Macko, MD

Human genome comparison of paretic and nonparetic vastus lateralis muscle in patients with hemiparetic stroke
Michael J. McKenzie, PhD, CSCS; Shuzhen Yu, MD; Richard F. Macko, MD; John C. McLenithan, PhD; Charlene E. Hafer-Macko, MD

Muscle and bone plasticity after spinal cord injury: Review of adaptations to disuse and to electrical muscle stimulation
Shauna Dudley-Javoroski, PT; Richard K. Shields, PhD, PT
