APPENDIX: SMART WHEELCHAIR BIBLIOGRAPHY

1. Automated-Guided Wheelchair—NEC Corporation, Japan

Wakaumi H, Nakamura K, Matsumura T. Development of an automated wheelchair guided by a magnetic ferrite marker lane. J Rehabil Res Dev. 1992;29(1):27–34.

2. Autonomous Wheelchair—Arizona State University, US

Madarasz RL, Heiny LC, Cromp RF, Mazur NM. Design of an autonomous vehicle for the disabled. IEEE J Robot Autom. 1986;2(3):117–25.

3. Chaise Roulante Autonome pour Handicapé Moteur (CHARHM)—Advanced Technologies Development Center, Algeria

Ouiguini R, Belloulou B. Navigation of an autonomous wheelchair in a structured environment. Proceedings of the 1996 IEEE IECON 22nd International Conference on Industrial Electronics, Control, and Instrumentation; 1996 Aug 5–10; Taipei, Taiwan. Piscataway (NJ): IEEE; 1996. p. 749–54.

4. Computer Assisted Wheelchair for Handicapped People (COACH)—French Atomic Energy Comission, France

Gelin R, Detriche JM, Lambert JP, Malblanc P. The sprint of COACH. Systems Engineering in the Service of Humans. Proceedings of the IEEE International Conference on Systems, Man and Cybernetics; 1993 Oct 17–20; Le Touquet, France. Piscataway (NJ): IEEE; 1993. p. 547–52.

5. Collaborative Wheelchair Assistant—National University of Singapore, Singapore

Boy ES, Teo CL, Burdet E. Collaborative wheelchair assistant. Proceedings of the 2002 IEEE/RSJ International Conference on Intelligent Robots and Systems (IROS); 2002 Sep 30–Oct 5; Lausanne, Switzerland. Piscataway (NJ): IEEE; 2002. p. 1511–16.

6. Computer-Controlled Power Wheelchair Navigation System—University of Notre Dame, US

Fehr L, Langbein WE, Skaar SB. Adequacy of power wheelchair control interfaces for persons with severe disabilities: A clinical survey. J Rehabil Res Devel. 2000;37(3):353–60.

Yoder JD, Baumgartner ET, Skaar SB. Initial results in the development of a guidance system for a powered wheelchair. IEEE Trans Rehabil Eng. 1996;4(3):143–51.

Yoder JD, Baumgartner ET, Skaar SB. Reference path description for an autonomous powered wheelchair. Robotics and Automation. Proceedings of the IEEE International Conference on Robotics and Automation (ICRA); 1994 May 8–13; San Diego, CA. Piscataway (NJ): IEEE; 1994. p. 2012–17.

Yoder JD, SB Skaar. Cue verification for an automatically-guided wheelchair system. Robotics and Automation. Proceedings of the IEEE International Conference on Robotics and Automation (ICRA); 1996 Apr 22–28; Minneapolis, MN. Piscataway (NJ): IEEE; 1996. p. 3135–40.

7. Hephaestus—Texas Robotics and Automation Center (TRAC) Laboratories, US
Simpson R, Poirot CD, Baxter MF. Evaluation of the Hephaestus smart wheelchair system. Proceedings of the 6th International Conference on Rehabilitation Robotics (ICORR); 1999 Jul 1–2; Stanford, CA. Stanford (CA): Rehabilitation Robotics ICORR; 1999. p. 99–105.

Simpson RC, Poirot D, Baxter MF. The Hephaestus smart wheelchair system. IEEE Trans Neural Syst Rehabil Eng. 2002;10(2):118–22.

Simpson RC, Poirot D, Baxter MF. The Hephaestus smart wheelchair system. Proceedings of the 22nd Annual International Conference on Assistive Technology for People with Disabilities (RESNA); 1999 June 25–29; Long Beach, CA. Arlington (VA): RESNA Press; 1999. p. 122–24.

8. Intelligent Wheelchair (INCH)—Yale University, US
Rao RS, Kuc R. INCH: An intelligent wheelchair prototype. Bioengineering. Proceedings of the 15th Annual Northeast Conference on Bioengineering; 1989 Mar 27–28; Boston, MA. Piscataway (NJ): IEEE; 1989. p. 35–36.

9. Intelligenter Rollstuhl (INRO)—Fachhochschule Ravensburg-Weingarten, Germany
Schilling K, Roth H, Lieb R, Stutzle H. Sensors to improve the safety for wheelchair users. In: Placencia Porrero I, Ballabio E, editors. Improving the quality of life for the European Citizen. Technology for inclusive design and equality. Amsterdam (Netherlands): IOS Press; 1998. p. 331–35. (Assistive technology research series; vol 4.)

10. Intelligent Wheelchair System—Osaka University, Japan

Adachi Y, Kuno Y, Shimada N, Shirai Y. Intelligent wheelchair using visual information on human faces. Proceedings of the 1998 IEEE/RSJ International Conference on Intelligent Robots and Systems (IROS); 1998 Oct 13–17; Victoria, BC, Canada. Piscataway (NJ): IEEE; 1998. p. 354–59.

Kuno Y, Murashima T, Shimada N, Shirai Y. Intelligent wheelchair remotely controlled by interactive gestures. Proceedings of the 15th International Conference on Pattern Recognition; 2000 Sep 3–7; Barcelona, Spain. Piscataway (NJ):IEEE; 2000. p. 672–75.

Kuno Y, Murashima T, Shimada N, Shirai Y. Interactive gesture interface for intelligent wheelchairs. Proceedings of the 2000 IEEE International Conference on Multimedia and Expo (ICME 2000); 2000 Jul 30–Aug 2; New York, NY. Piscataway (NJ): IEEE; 2000. p. 789–92.

Kuno Y, Murashima T, Shimada N, Shirai Y. Understanding and learning of gestures through human-machine interaction. Proceedings of the 2000 IEEE/RSJ International Conference on Intelligent Robots and Systems (IROS); 2000 Oct 31–Nov 5; Takamatsu, Japan. Piscataway (NJ): IEEE; 2000. p. 2133–38.

Kuno Y, Nakanishi S, Murashima T, Shimada N, Shirai Y. Intelligent wheelchair based on the integration of human and environment observations. Proceedings of the 1999 International Conference on Information Intelligence and Systems; 1999 Oct 31–Nov 3; Bethesda, MD. Piscataway (NJ): IEEE; 1999. p. 342–49.

Kuno Y, Nakanishi S, Murashima T, Shimada N, Shirai Y. Robotic wheelchair observing its inside and outside. Proceedings of the 1999 International Conference on Image Analysis and Processing; 1999 Sep 27–29; Venice, Italy. Piscataway (NJ): IEEE; 1999. p. 502–7.

Kuno Y, Nakanishi S, Murashima T, Shimada N, Shirai Y. Robotic wheelchair with three control modes. Robotics and Automation. Proceedings of the IEEE International Conference on Robotics and Automation (ICRA); 1999 May 10–15; Detroit, MI. Piscataway (NJ): IEEE; 1999. p. 2590–95.

Kuno Y, Shimada N, Shirai Y. Look where you're going [robotic wheelchair]. IEEE Robot Autom Mag. 2003;10(1);26–34.

Kuno Y, Yoshimura T, Mitani M, Nakamura A. Robotic wheelchair looking at all people with multiple sensors. Proceedings of IEEE International Conference on Multisensor Fusion and Integration for

Intelligent Systems (MFI2003); 2003 Jul 30–Aug 1; Tokyo, Japan. Piscataway (NJ): IEEE; 2003. p. 341–46.

Murakami Y, Kuno Y, Shimada N, Shirai Y. Collision avoidance by observing pedestrians' faces for intelligent wheelchairs. Proceedings of the 2001 IEEE/RSJ International Conference on Intelligent Robots and Systems (IROS); 2001 Oct 29–Nov 3; Maui, HI. Piscataway (NJ): IEEE; 2001. p. 2018–23.

Murakami Y, Kuno Y, Shimada N, Shirai Y. Intelligent wheelchair moving among people based on their observations. 2000 IEEE International Conference on Systems, Man and Cybernetics; 2000 Oct 8–11; Nashville, TN. Piscataway (NJ): IEEE; 2000. p. 1466–71.

Nakanishi S, Kuno Y, Shimada N, Shirai Y. Robotic wheelchair based on observations of both user and environment. Proceedings of the 1999 IEEE/RSJ International Conference on Intelligent Robots and Systems (IROS); 1999 Oct 17–21; Kyongju, South Korea. Piscataway (NJ): IEEE; 1999. p. 912–17.

11. Intelligent Wheelchair—University of Texas at Austin, US

Gribble WS, Browning RL, Hewett M, Remolina E, Kuipers BJ. Integrating vision and spatial reasoning for assistive navigation. In: Mittal VO, Yanco HA, Aronis J, Simpson RC, editors. Lecture notes in artificial intelligence: Assistive technology and artificial intelligence: Applications in robotics, user interfaces and natural language processing. Heidelburg (Germany): Springer-Verlag; 1998. p. 179–93. (Lecture notes in computer science; vol 1458.)
