Appendix 3: Saccadic Eye Movements for the Monocular Patient

I. **Level 1: distance**—Place a large Hart© chart at approximately 6 feet from the patient. Starting at row one, read out loud, the 1\textsuperscript{st} and last letter; then read the 1\textsuperscript{st} and last letter of row 2. Continue reading 1\textsuperscript{st} and last letter to row 10.

   Go back to row one and read the 2\textsuperscript{nd} letter and the 2\textsuperscript{nd} to the last letter. Repeat for rows 2–10.

   Go back to row one and read the 3\textsuperscript{rd} letter and the 3\textsuperscript{rd} to the last letter. Repeat for rows 2–10.

   Go back to row one and read the 4\textsuperscript{th} letter and the 4\textsuperscript{th} to the last letter. Repeat for rows 2–10.

   Go back to row one and read the 5\textsuperscript{th} letter and the 5\textsuperscript{th} to the last letter. Repeat for rows 2–10.

   **Level 1: near**—Repeat instructions above using a smaller Hart© chart at approximately 16 inches.

II. **Level 2: distance**—Place two large Hart© charts at approximately 6 feet from the patient. These two charts should be separated at a distance requiring the person to move their head to complete the saccadic movement.

   Starting at row one, read out loud, the 1\textsuperscript{st} letter of the chart on the left and the last letter the chart on the right; repeat for rows 2–10.

   Go back to row one, read the 2\textsuperscript{nd} letter of the chart on the left and the 2\textsuperscript{nd} to last letter of chart on the right; repeat for rows 2–10.

   Continue reading column 3 of chart on left and column 7 of chart on right from rows 1–10. Then column 4 and 6; column 5 and 5, column 6 and 4, etc., until chart is complete.

   **Level 2: near**—Repeat instructions above using two smaller Hart© chart at approximately 16 inches.
