

Exercise After Stroke and SCI
Single-Topic Issue

CONTENTS

- iii** Masthead
- vii** Guest Editorial:
Exercise after stroke and spinal cord injury: Common biological mechanisms and physiological targets of training
Richard F. Macko, MD; Joseph Hidler, PhD
- xi** *JRRD* at a Glance

Scientific/Technical Articles

- 205** Exercise-mediated locomotor recovery and lower-limb neuroplasticity after stroke
Larry W. Forrester, PhD; Lewis A. Wheaton, PhD; Andreas R. Luft, MD
- 221** Effect of treadmill exercise training on spatial and temporal gait parameters in subjects with chronic stroke: A preliminary report
Shawwna L. Patterson, MD, PhD; Mary M. Rodgers, PhD, PT; Richard F. Macko, MD; Larry W. Forrester, PhD
- 229** Activity-dependent plasticity in spinal cord injury
James V. Lynskey, PhD, PT; Adam Belanger, MS; Ranu Jung, PhD
- 241** Treadmill training after spinal cord injury: It's not just about the walking
Audrey L. Hicks, PhD; Kathleen A. Martin Ginis, PhD
- 249** Task-oriented treadmill exercise training in chronic hemiparetic stroke
Frederick M. Ivey, PhD; Charlene E. Hafer-Macko, MD; Richard F. Macko, MD
- 261** Skeletal muscle changes after hemiparetic stroke and potential beneficial effects of exercise intervention strategies
Charlene E. Hafer-Macko, MD; Alice S. Ryan, PhD; Fred M. Ivey, PhD; Richard F. Macko, MD
- 273** Human genome comparison of paretic and nonparetic vastus lateralis muscle in patients with hemiparetic stroke
Michael J. McKenzie, PhD, CSCS; Shuzhen Yu, MD; Richard F. Macko, MD; John C. McLenithan, PhD; Charlene E. Hafer-Macko, MD
- 283** Muscle and bone plasticity after spinal cord injury: Review of adaptations to disuse and to electrical muscle stimulation
Shauna Dudley-Javoroski, PT; Richard K. Shields, PhD, PT

- 297** Balance, falls, and bone health: Role of exercise in reducing fracture risk after stroke
Janice J. Eng, PhD, PT/OT; Marco Y. C. Pang, PhD, PT; Maureen C. Ashe, PhD, PT
- 315** Barriers associated with exercise and community access for individuals with stroke
James H. Rimmer, PhD; Edward Wang, PhD; Donald Smith, MS
- 323** Adaptive physical activity improves mobility function and quality of life in chronic hemiparesis
Richard F. Macko, MD; Francesco Benvenuti, MD; Steven Stanhope, PhD; Velio Macellari, DrEng; Antonia Taviani, MD; Barbara Nesi, PT; Michael Weinrich, MD; Mary Stuart, ScD
- 329** Exercise for chronic stroke survivors: A policy perspective
Mary Stuart, ScD; Sarah Chard, PhD; Suzanna Roettger, MA
- 337** Automating activity-based interventions: The role of robotics
Joseph Hidler, PhD; Larry F. Hamm, PhD, FAACVPR, FACSM; Alison Lichy, MSPT; Suzanne L. Groah, MD, MSPH

Back Matter

- 345** Guidelines for Contributors (Abbreviated Version)
