SURGERY

"Publications of Interest" is presented primarily as a service of information for our readers. To a limited extent, this office may be able to furnish, from the resources of the Reference Collection, page copies of a specific article, provided that you can indicate that the source journal is not available to you.

Please note that the above does not apply to books, which should be obtained from the publishers. (The publisher of each work, and the price, are listed with the publication title.)

The books and journals listed (as well as the Reference Collection’s article reprint files) are available for examination and study at the Office of Technology Transfer in New York City. Individuals planning to visit the Rehabilitation Research and Development Reference Collection are advised to consult with the librarian by telephone in advance. (Telephones are: Federal Telephone Systems (FTS) 660-6659 and 6671. Commercial telephone numbers are 212-620-6659 and 6671.)
