The Journal’s “Publications of Interest” pages list selected articles, books, and reports dealing with the following subject areas: Bioengineering & Biomechanics, General (Rehabilitation), Orthotics, Prosthetics, Sensory Aids, Spinal Cord Injury, and Surgery (Amputation). Most of the articles cited are selected from journals subscribed to by the Office of Technology Transfer (OTT) Reference Collection, while others have been obtained directly from the authors after the works had been abstracted in Bioengineering Abstracts and/or Excerpta Medica, or were cited as references and reviews in other source documents.

To obtain a copy of a specific article, readers are advised to direct inquiries to the author. The name and address of the author to be contacted appears at the end of each listing. In most instances, reprints of recent papers are available free of charge from authors.

Books and reports should be obtained from the publishers. The name and address of the publisher, and the price, appear with the publication title.

The books, journals, and reprints listed in “Publications of Interest” may be examined or used for study at the OTT premises, but do not circulate. Individuals planning to visit the Rehabilitation R&D Reference Collection are advised to write or telephone in advance to Ms. Lily W. Hom, Technical Information Specialist, Office of Technology Transfer, Rehabilitation R&D Reference Collection, 252 Seventh Avenue, New York, New York 10001. Callers using the Federal Telephone System should call FTS 660-6659 or 6670; the commercial numbers are (212) 620-6659 and 6670.

### BIOENGINEERING

### BIOMECHANICS

An Index to Measure the Healing Potential of Ischaemic Ulcers Using Thallium 201, M.E. Siegel (University of Southern California School of Medicine, Los Angeles County USC Medical Center, Rancho Los Amigos Hospital, Downey, California 90242, U.S.A.), C.A. Stewart, F.W. Wagner, Jr. and I Sakimura; Pros. & Orthot. Internat., 7(2):67-68, Aug. 1983.

Metabolic and Cardiopulmonary Responses of Older Wheelchair-Dependent and Ambulatory Patients During Locomotion, R.M. Glaser (Laboratory of Applied Physiology, Wright State University School of Medicine, Dayton, Ohio 45435, U.S.A.), C.A. Simsen-Harold and J.S. Petrofsky; Ergonomics, 26(7):687-697, Jul. 1983.

The Use of a Four-Channel Electrical Stimulator as an Ambulatory Aid for Paraplegic Patients, T. Bejd (Dept. of Electrical Engng., Edvard Kardelj University, 61000 Ljubljana,

Walking Cane Designed to Assist Partial Weight Bearing, J. Engel (Hand Surgery Unit, Sheba Medical Center, Tel Hashomer, Israel), A. Amir, E. Messer and I. Caspi; Arch. Phys. Med. & Rehab., 64(8): 386-388, Aug, 1983.

ORTHOTICS

PROSTHETICS

Biomechanics of the Through-Knee Prosthesis, J. Hughes (Director, National Centre for Training and Education in Prosthetics and Orthotics, University of Strathclyde, The Curran Building, 131 St. James’ Road, Glasgow G4 OLS, Scotland); Pros. & Orthot. Internat’l., 7(2):88-95, Aug, 1983.

Casting the Through-Knee Stump, E. Lyquist (The Society and Home for the Disabled in Denmark, Prosthetic and Orthotic Department, Borgvarest, 5,2100 Copenhagen Ø, Denmark); Pros. & Orthot. Internat’l., 7(2):104-106, Aug. 1983.

The Early Rehabilitation of Lower Limb Amputees Using a Pneumatic Walking Aid, R.G. Redhead (The Limb Fitting Centre, Roehampton Lane, London SW15 5PR, United Kingdom); Pros. & Orthot. Internat’l., 7(2):88-90, Aug. 1983.

Elastic Suspension Sleeve for Below the Knee Prostheses, J.P. Leimkuehler (Secretary/Treasurer of Leimkuehler, Inc., Cleveland, Ohio, U.S.A.); Orthot. & Pros., 37(1):52-54, 1983.

Socket Design and Manufacturing Technique for Through-Knee Stumps, P. Botte and R. Baumgartner (Belgirt Orthopaedic Hospital, Forchstr. 340, CH-8008, Zurich, Switzerland); Pros. & Orthot. Internat’l., 7(2):100-103, Aug, 1983.

Success Rate of Prosthetic Fitting after Major Amputations of the Lower Limb, J. Steen Jensen (Department of Orthopaedic Surgery U, Rigshospitalet, University of Copenhagen, DK-2100 Copenhagen Ø, Denmark) and T. Mandrup-Poulsen; Pros. & Orthot. Internat’l., 7(2):119-121, Aug, 1983.

Tolerance of Early Walking with Total Contact Among Below-Knee Amputees—A Randomized Test, E. Liebed (Department of Orthopaedic Surgery, Lund University Hospital, S-221 Lund, Sweden), H. Hommerberg and B.M. Persson; Pros. & Orthot. Internat’l., 7(2):91-95, Aug, 1983.

Reduction of Radiation Dose in Radiologic Examination of Patients with Scoliosis, G. Hellström, L. Iram (Dept. of Diagnostic Radiology, University of Göteborg, Sahlgrens's Hospital, Göteborg S-413 45, Sweden), and A. Nachemson; Spine, 8(1): 75-78, Jan.-Feb. 1983.

Surgery

Choice of Level in Lower Extremity Amputation— Nationwide Survey, B. Ebekov (Danish Amputation Register, P.O. Box 899, DK-2100, Copenhagen, Denmark); Pros. & Orthot. Internat'l., 7(2):58-60, Aug. 1983.

Failure in Through-Knee-Amputation, R. Baumgartner (Balgrist Orthopaedic Hospital, Forchstr. 340, CH-8008, Zurich, Switzerland); Pros. & Orthot. Internat'l., 7(2):118-119, Aug. 1983.

Physiotherapy Following Through-Knee Amputation, G. Mansch (Chief Physical Therapist, Physiotherapy Department, Henderson General Hospital, 711 Concession Street, Hamilton, Ontario, Canada L8V 1C3); Pros. & Orthot. Internat'l., 7(2):79-87, Aug. 1983.

The Postoperative Environment of the Amputation Stump, G. Murdoch (Limb Fitting Centre, 133 Queen Street, Broughty Ferry, Dundee, Scotland); Pros. & Orthot. Internat'l., 7(2):75-78, Aug. 1983.
