Editor's Note

Over the past year, the VA office of Technology Transfer has compiled an index of published literature representative of research and development in the field of rehabilitation from 1979 to the present. Scientific, bioengineering, and biomedical periodicals and books containing relevant information were researched. Titles selected for inclusion in the index reflect the comprehensive rehabilitation literature for this time period. Selections from the Publications of Interest section of the *Journal* and its predecessor, the *Bulletin of Prosthetics Research*, are also included.

The index is categorized in accordance with the Veterans Administration Research and Development priorities for rehabilitation research and development: Prosthetics/Amputation, Spinal Cord Injury, and Sensory Aids. Specific areas of research are delineated by subheadings within the three major categories. The entries are numbered and are arranged alphabetically by title within each subject heading. The appendix lists authors and publication entry numbers.

A future issue of the *Journal* will explore the accessibility of the results of rehabilitation research and development through available literature searches. An experiment to comprehensively reference the literature on wheelchairs will be presented. Information retrieval will consist of searches in specific areas of the literature, i.e., patents, conference proceedings, and audio-visual material, as well as traditional publications. Access tools such as search strategies and information gateways will also be described.

The Office of Technology Transfer presents these special issues of the *Journal* for the purpose of enhancing professional and practioner awareness of available resources in the field of rehabilitation research and development. Your comments on this effort are welcomed.

Seldon P. Todd, Jr.

Journal title abbreviations used in this index conform to the rules of the American National Standard for Abbreviation of Titles of Periodicals. For a complete listing of periodicals with their abbreviations, consult the List of Journals Indexed in Index Medicus, 1985 edition.

Table of Contents

Note: Figures in brackets refer to bibliographic entry numbers.

```
PROSTHETICS/AMPUTATION [1-1624]
 No.
       General Amputation [1-105]
 3

    Lower Limb /38-88/

 6

    Upper Limb /89-105/

 8
       Amputation Level [106-122]
 9
       Amputation Stumps [123-153]

    Stump Bandaging [152, 153]

11
11
       Amputees [154-202]
14

    Psychology [203,204]

14
       Biomechanics (205-686)
17
       • Electromyography [240-317]
22

    Foot Pressure Analysis [318-362]

25

    Gait Analysis [363-554]

33

    Amputee Gait [487-502]

35

    Crutch Walking [503-519]

36
        • Energy Expenditure [520-533]
37
        Gait Deviations [534-554]
38

    Human Motion Analysis [555-570]

40
       Joint Force Analysis [571-655]
40

    Lower Limb /582-627/

43

    Upper Limb [628-655]

45

    Muscular Contractions [656-686]

48
       Bone [687-765]
       • Bone Fractures [692-718]
48
50

    Electrical Stimulation [719-746]

52

    Mechanical Properties [747-765]

       Orthopedic Implants [766-1000]
53
57
       • Joint Prostheses [815-848]
59

    Total Hip Implants [849-928]

65

    Total Knee Implants [929-1000]

70
       Orthopedic Surgery [1001-1011]
70
