

CONTENTS

H. Levitt xii Guide to the Issue

Introduction

A.C. Neuman 1 Digital technology and clinical practice: The outlook for the future

H. Levitt 7 Digital hearing aids: A tutorial review

Section I. Digital Hearing Aids

G.A. Studebaker 21 Spectrum shaping with a hardware digital filter
R.L. Sherbecoe
J.S. Matesich

H. Levitt 29 Experiments with a programmable master hearing aid
J.A. Sullivan
A.C. Neuman
J.A. Rubin-Spitz

A.M. Engebretson 55 Development of an ear-level digital aid and computer-assisted fitting procedure: An interim report
R.E. Morley
G.R. Popelka

Section II. Noise Reduction

D.M. Chabries 65 Application of adaptive digital signal processing to speech enhancement for the hearing impaired
R.W. Christiansen
R.H. Brey
M.S. Robinette
R.W. Harris

R.H. Brey 75 Improvement in speech intelligibility in noise employing an adaptive filter with normal and hearing-impaired subjects
M.S. Robinette
D.M. Chabries
R.W. Christiansen

T.J. Schwander 87 Effect of two-microphone noise reduction on speech recognition by normal-hearing listeners
H. Levitt

M. Weiss 93 Use of an adaptive noise canceller as an input preprocessor for a hearing aid

P.M. Peterson 103 Multimicrophone adaptive beamforming for interference reduction in hearing aids
N.I. Durlach
W.M. Rabinowitz
P.M. Zurek

Contents continued

- D. Chazan*
Y. Medan
U. Shvadron **111** Evaluation of adaptive multimicrophone algorithms for hearing aids
- D. Graupe*
J.K. Grosspietsch
S.P. Basseas **119** A single-microphone-based self-adaptive filter of noise from speech and its performance evaluation
- A.C. Neuman*
T.J. Schwander **127** The effect of filtering on the intelligibility and quality of speech in noise
-

Section III. Speech Processing Hearing Aids

- E. Villchur* **135** Multichannel compression processing for profound deafness
- D.K. Bustamante*
L.D. Braida **149** Multiband compression limiting for hearing-impaired listeners
- E.W. Yund*
H.J. Simon
R. Efron **161** Speech discrimination with an 8-channel compression hearing aid and conventional aids in background of speech-band noise
- B.C.J. Moore* **181** Design and evaluation of a 2-channel compression hearing aid
- M.P. Haggard*
J.R. Trinder
J.R. Foster
A.C. Lindblad **193** Two-state compression of spectral tilt: Individual differences and psychoacoustical limitations to the benefit from compression
- S.G. Revoile*
L. Holden-Pitt
D. Edward
J.M. Pickett
F. Brandt **207** Speech-cue enhancement for the hearing-impaired: Amplification of burst/murmur cues for improved perception of final stop voicing
- R.W. Guelke* **217** Consonant burst enhancement: A possible means to improve intelligibility for the hard of hearing
- A.A. Montgomery*
R.A. Prosek
B.E. Walden
M.T. Cord **221** The effects of increasing consonant/vowel intensity ratio on speech loudness

<i>C.W. Turner</i> <i>L.A. Holte</i> <i>E. Relkin</i>	229	Auditory filtering and the discrimination of spectral shapes by normal and hearing-impaired subjects
<i>S. Rosen</i> <i>J.R. Walliker</i> <i>A. Fourcin</i> <i>V. Ball</i>	239	A microprocessor-based acoustic hearing aid for the profoundly impaired listener

Section IV. Issues of Measurement

<i>H. Levitt</i>	261	A cancellation technique for the amplitude and phase calibration of hearing aids and nonconventional transducers
<i>J.M. Kates</i>	271	The short-time articulation index
<i>M.J. Williamson</i> <i>K.L. Cummins</i> <i>K.E. Hecox</i>	277	Speech distortion measures for hearing aids
<i>H. Levitt</i> <i>E. Cudahy</i> <i>W. Hwang</i> <i>E. Kennedy</i> <i>C. Link</i>	283	Towards a general measure of distortion

Bibliographic Section

<i>H. Nowotarski</i>	293	Literature Search of Publications on Digital Hearing Aids
<i>H. Nowotarski</i>	295	Patents: Digital Hearing Aids and Related Devices

Departments

<i>J.E. Edelstein</i>	305	Abstracts of Recent Literature
<i>B.M. Benjers</i>	317	Publications of Interest
<i>B.M. Benjers</i>	351	Calendar of Events
