PUBLICATIONS OF INTEREST

Compiled by Beryl M. Benjers, PhD
Technical Information Specialist

This list of references offers Journal readers significant information on the availability of recent rehabilitation literature in various scientific, engineering, and clinical fields. The Journal provides this service in an effort to fill the need for a comprehensive and interdisciplinary indexing source for rehabilitation literature.

All entries are numbered so that multidisciplinary publications may be cross-referenced. They are indicated as See also at the end of categories where applicable. A listing of the periodicals reported on follows the references. To obtain reprints of a particular article or report, direct your request to the appropriate contact source listed in each citation.
