---

The *Journal of Rehabilitation Research and Development* is a quarterly publication of the Rehabilitation Research and Development Service, Department of Veterans Affairs. The opinions of contributors are their own and are not necessarily those of the Department of Veterans Affairs. Address correspondence to: Editor, *Journal of Rehabilitation Research and Development*, Office of Technology Transfer, VA Prosthetics R&D Center, 103 South Gay Street, Baltimore, MD 21202-4051.

Contents of the *Journal of Rehabilitation Research and Development* are within the public domain with the exception of material specifically noted.

The *Journal of Rehabilitation Research and Development* and its supplements are printed on acid-free paper, as of Vol. 25 No. 2 (Spring 1988).

## Journal of Rehabilitation Research and Development

### NOTICE TO CONTRIBUTORS

#### Purpose and Scope

The *Journal of Rehabilitation Research and Development*, published quarterly, is a scientific engineering publication in the multidisciplinary field of disability rehabilitation. General priority areas are: Prosthetics and Orthotics; Spinal Cord Injury and Related Neurological Disorders; Communication, Sensory and Cognitive Aids; and, Gerontology. The *Journal* receives submissions from sources within the United States and throughout the world.

Only original scientific rehabilitation engineering papers will be accepted. Technical Notes describing preliminary techniques, procedures, or findings of original scientific research may also be submitted. Letters to the Editor are welcome. Books for review may be sent by authors or publishers. The Editor will select reviewers.

#### Review Process

All scientific papers submitted to the *Journal* are subject to critical peer review by at least two referees, either editorial board members or ad hoc consultants, who have special expertise in a particular subject. To ensure objectivity, anonymity will be maintained between the author(s) and the referees. The final decision as to the paper's suitability for publication rests with the Editor of the *Journal*.

#### Originality

Authors must confirm that the contribution has not already been published by or submitted to another journal. The submission letter must be signed by all authors.

#### Instructions to Contributors

*Manuscripts* should meet these requirements: 1) Papers must be original and written in English. 2) Manuscripts must contain an Abstract, Introduction, Method, Results, Discussion, Conclusion, and References. 3) Manuscripts are to be typewritten on good quality 8½ x 11 inch white paper double-spaced, with liberal margins. 4) A 3½ or 5¼ inch floppy disk (nonreturnable) preferably in IBM-PC format—generic ASCII text (if using other software version, label disk accordingly) should accompany the hard copy. If using Macintosh, please so advise in cover letter.

*Abstracts:* An Abstract of 150 words or less must be provided with the submitted manuscript. It should give the factual essence of the article and be suitable for separate publication in index journals.

*Key Words:* Three to ten key words, preferably terms from the Medical Subject headings from Index Medicus should be provided.

*Illustrations:* In preparing original drawings or graphs, authors should use black or India ink. Professional lettering is required. Lettering should be large enough to be read when drawings are reduced. Black and white computer-generated graphics are acceptable. Five-by-seven-inch glossy print photographs are preferred; good black and white contrast is essential. Color photographs cannot be accepted. All figures should have legends, listed on a separate sheet.

*References* should be cited in the Vancouver style. They should be typed separately, double-spaced, and numbered consecutively in the order in which they are first mentioned in the text, with only one reference per number. The number appropriate to each reference should be included in parentheses at the proper point in the text. "Unpublished

observations" or "personal communications," in which the author has secured the permission of the person cited, should be treated as footnotes and not be included in the numbering of references. Authors are responsible for the accuracy of their references. Please follow these sample formats:

Article. Gilsdorf P, Patterson R, Fisher S. Thirty-minute continuous sitting force measurements with different support surfaces in the spinal cord injured and able-bodied. *J Rehabil Res Dev* 1991;28:33-8.

Chapter in a Book. Wagner KA. Outcome analysis in comprehensive rehabilitation. In: Fuhrer MJ, ed. *Rehabilitation outcomes*. Baltimore: Brookes Publishing Co., 1987:233-9.

Published Proceedings Paper. Hammel JM, Van der Loos M. A vocational assessment model for use of robotics technology. In: Presperin JJ, ed. *Proceedings of the 13th Annual RESNA Conference*, 1990:327-8.

*Tables* should not duplicate material in text or illustrations. They should be numbered consecutively with Arabic numerals cited in the text. Each table should be typed double-spaced on a separate sheet and should have a brief title. Short or abbreviated column heads should be used and explained, if necessary, in footnotes.

*Mathematical Formulas and Specialized Nomenclature:* Traditional mathematical treatments should be extended by adding brief narrative notes of explanation and definitions of terms, as appropriate, to ensure that readers of other disciplines gain the fullest understanding of the material presented. Standard International (SI) metric units are requested for use in all quantities in text, tables, and figures.

#### Permissions and Copyright

Articles published and their original illustrations (unless borrowed from copyrighted sources) are in the public domain. Borrowed illustrations must contain full information about previous publication and credit to be given. Authors must obtain permission to reproduce figures, signed release forms for use of photographs containing identifiable persons, and submit originals of those signed documents with the manuscript.

#### Review of Proofs

Galley proofs will be sent to the first-named author, unless otherwise requested. To avoid delays in publication, galley proofs should be checked immediately and returned to the publishers by express mail within five working days.

#### Reprints Policy/Procedures

The DVA will provide 100 reprints free of charge to the first-named author (or other designated corresponding author) of published articles at the time of *Journal* distribution.

#### Manuscripts should be submitted to:

**CONTENTS**

---

**Scientific/Technical Articles**

---

- 1** Metabolic and hemodynamic responses to concurrent voluntary arm crank and electrical stimulation leg cycle exercise in quadriplegics  
*Steven P. Hooker, PhD; Stephen F. Figoni, PhD, RKT; Mary M. Rodgers, PhD, PT; Roger M. Glaser, PhD; Thomas Mathews, MD; Agaram G. Suryaprasad, MD; Satyendra C. Gupta, MD*
- 12** Biomechanical analysis of wheelchair propulsion for various seating positions  
*Louise C. Mâsse; Mario Lamontagne, PhD, PErg; Micheal D. O'Riain, PhD, PEng*
- 29** The contribution of selected anthropometric and physiological variables to 10K performance of wheelchair racers: A preliminary study  
*Rory A. Cooper, PhD*
- 35** A computer-aided socket design procedure for above-knee prostheses  
*Richard Torres-Moreno; James B. Morrison; David Cooper; Carl G. Saunders; James Foort*
- 45** A two-step segmentation method for automatic recognition of speech of persons who are deaf  
*Kadry A. Abdelhamied, PhD; Manjula B. Waldron, PhD; Robert A. Fox, PhD*
- 57** Computer as a group teaching aid for persons who are blind (*A Technical Note*)  
*Sujoy K. Guha, MTech, MS, PhD, MBBS and Sneha Anand, MTech, PhD*
- 

**Departments**

---

- 64** Abstracts of Recent Literature, by *Joan E. Edelstein, MA, PT*
- 76** Book Reviews, by *Jerome D. Schein, PhD and Leslie Torburn, MS, PT*
- 78** Publications of Interest
- 96** Calendar of Events
- 100** Letters to the Editor
