- ix Clinical Relevance for the Veteran: Summaries of Scientific/Technical Articles
Harry Levitt, PhD

Scientific/Technical Articles

- 297 On the evaluation of a new generation of hearing aids
Robyn M. Cox, PhD
- 305 Preferred frequency response for two- and three-channel amplification systems
Donald D. Dirks, PhD; Jayne Ahlstrom, MS; P. Douglas Noffsinger, PhD
- 318 Do adaptive frequency response (AFR) hearing aids reduce 'upward spread' of masking?
David A. Fabry, PhD; Marjorie R. Leek, PhD; Brian E. Walden, PhD; Mary Cord, MA
- 326 Effects of prolonged lack of amplification on speech-recognition performance: Preliminary findings
Shlomo Silman, PhD; Carol A. Silverman, PhD; Michele B. Emmer, MS; Stanley A. Gelfand, PhD
- 333 High-frequency testing techniques and instrumentation for early detection of ototoxicity
Stephen A. Fausti, PhD; Richard H. Frey, BS; James A. Henry, MS; Deanna J. Olson, MS; Heidi I. Schaffer, MA

Clinical Report

- 342 Development and Use of Auditory Compact Discs in Auditory Evaluation
Richard H. Wilson, PhD
